

Delivering people and technology to asset-intensive industries across Australia and around the world

### Industry sectors

- ✓ DEFENCE
- ✓ GOVERNMENT
- ✓ MINING
- ✓ UTILITIES
- ✓ MANUFACTURING

## Who we are

Relegen has a proven track record of supplying people and technology-based solutions to the Australian Defence Force for well over a decade. Today, our expertise is leveraged by clients operating in asset-intensive industries including mining, government, manufacturing, utilities and more. We are an accredited Major Service Provider to the Defence Materiel Organisation Support Services Panel, ISO 9001 certified and a preferred supplier to top tier firms.

## What we do

Relegen offers more than other contract workforce providers. Through our extensive networks we can deliver a wide range of technical, IT/ICT, logistics, project management, business and operational support, engineering capabilities as well as security cleared personnel, for short or long term contracts. We are also the developers of assetDNA, an asset intelligence technology solution which helps organisations significantly improve their approach to asset management.

# Why Relegen?

## People with specialist skills and extensive networks

Relegen's deep expertise stems from delivering people and technology to the Australian Defence Force for 12+ years – expertise that has been successfully leveraged for industry leaders in government, mining and more. Our management team have defence force backgrounds and we maintain relationships that allow us to network deep within defence and industry. We can provide security cleared personnel with highly-specialised knowledge for short or long term contracts to fulfil skill gaps, surge requirements, support smaller projects or entire site operations.

## Accredited DMOSS Major Service Provider

As an accredited Major Service Provider to the Defence Materiel Organisation Support Services Panel, Relegen has an intimate understanding of defence project requirements. Our unique combination of people and technology-based solutions enable us to address the needs of some of the most challenging issues facing the Defence sector today and into the future.

## A reputation for engineering excellence

Relegen has built a reputation for delivering innovative solutions to some of the toughest engineering projects across Defence, mining and more. We have been recognised by Rio Tinto's 'Top Ten Supplier Recognition Program' two years in a row. Our products and services are designed with one thing in mind – our client's success. We focus on business outcomes, service delivery and performance improvement.

## Global leaders in asset intelligence

We have something more to offer customers than other contract workforce providers – we bring together best practice engineering know-how and asset intelligence technology, honed over many years working with the ADF. Our product – assetDNA – helps organisations unify asset data silo's into a single, authoritative point of truth – one that is in lockstep with real-world assets in-the-field. Organisations can use this new-found asset intelligence to significantly reduce the time between information, decision and action to drive innovation in asset utilisation, business processes, productivity and performance.
